

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site Name:	Rockville TBD
Applicant's Name:	Rockville TBD Corporation
Site Location:	6450 South Belmont Indianapolis Marion County
VRP Site Number:	6950701
Project Manager:	Laura Johnson
Date Application Received:	July, 1995
Date Project Completed:	February, 1997
Project Duration:	1 year, 7 months
Contaminant Group(s):	Volatile Organic Compounds (VOCs)
Media Cleaned Up:	Soil, Groundwater
Cleanup Goals Achieved:	Tier II Nonresidential
Deed/Land Use Restrictions:	Nonresidential

Project Description: This site was developed from a private residence and orchard into a manufacturing facility in 1962. From that time on, it has been connected to the manufacture and assembly of airplane parts.

The site entered the VRP to address solvent contamination which appeared to be linked to an old septic system. Prior to entering the VRP, this site had undergone numerous soil and groundwater investigations, as well as site improvements (including, but not limited to, disconnecting the septic system and connecting to sanitary sewer). All of the site investigations indicated that the only problem area on the site was near the abandoned septic system and leach field. Investigations had indicated contamination concentrations well below the Tier II Nonresidential cleanup standards, so the company proposed to simply collect confirmation samples for closure.

Soil samples were collected, and groundwater samples were gathered for four consecutive months. Results indicated contamination levels well below the Tier II nonresidential standard.
